Chair's Report

Barbara Montanary-Schader

I am writing this as we approach Halloween and you will be reading it as we approach the December holidays. The year is truly going much too fast!

The program for the annual meeting is progressing satisfactorily and I will write extensively on the details of the program in the February newsletter. For now, however, I will just mention that Ann Campbell has managed to set up a field trip for Wednesday, June 12, to the Southwest Foundation for Biomedical Research in San Antonio. This private, nonprofit foundation houses 3500 nonhuman primates and 4000 animals of other species and is known for its humane treatment of its animals. (Jane Goodale mentions the foundation as a model for animal care.) Animals no longer used for research retire to pleasant quarters and are supported by the invested funds they earned while participating in research - a sort of ape social security. Research areas currently of interest to the foundation include AIDS research, atherosclerosis, osteoporosis, and skin cancer. One of the foundation's more important successes is the development of a high frequency ventilation device used for premature infants with hyaline membrane disease. More than 400 infants have been saved with this experimental device in the past three years. I hope you will all join us for this field trip. It should prove fascinating! I will have a guided tour probably with lunch on the grounds. Look for details in your preliminary program in February.

BSD Director, Jane Cole and BSD Past-Chair Anna McGowan are working on the BSD Long Range Plan. I know both of them would like to hear your thoughts on the following areas:

1. What are the current strengths of BSD?
2. What should we be doing to build on these strengths?
3. Are there any current programs which need changing or upgrading?
4. Are there new areas we need to address as a division?

Continued on page 2

Continued from page 1

5. Are there things which the division officers should be doing or addressing that we are not currently?
6. Do we need to be involved in new programs?
7. Should we delete any of our current programs or activities?
8. What do you think our priorities should be for the next five years? next ten years?
9. Other?

This is your opportunity to help shape your division for the next decade. The division is only as proactive and vital as its individual members. Let's all send our thoughts and suggestions to Anna (202/245-1236) or Jane (602/941-1225).

We need to find sponsors for many of our BSD activities at the annual meeting. Every year we have certain sponsors that we can depend upon such as BIOSIS, Springer, Elsevier and Readmore. But, is always important to be identifying new sponsors in addition to the above who might be interested in sponsoring a program, a hospitality suite, or even interested in taking out an ad in *Biofeedback*. So, if you use a specific vendor who might be interested in sponsoring a BSD event or taking out an ad, please let me or Chair-Elect Cami Loucks know. My number is 714/474-6477 (fax 714/474-6488) and Cami is at 816/751-2270. Sponsoring a BSD event is often a good way for a vendor to meet people who will be interested in his/her product or service. Sponsoring is of mutual benefit to BSD and the vendors.

We now have volunteers for San Antonio hospitality! I want to thank Robin Raquet, Maddux Library, Trinity University in San Antonio and Charles Sargent, Briscoe Library, University of Texas Health Science Center at San Antonio. Thank you Robin and Charles! We will all have many questions for you and we thank you in advance for volunteering.

Happy Holidays and Peaceful New Year to all of you.

MASTERMINDING TOMORROW'S INFORMATION . . . Creative Strategies for the '90s

Special Libraries Association
82nd Annual Conference
San Antonio, Texas
June 8-13, 1991

Continued from page 9

Onnalee Roehsler

Onnalee is a Technical Information Specialist at the Centers for Disease Control Information Center in Atlanta, Georgia. Her duties include database searching, responding to reference questions, and collection development. Onnalee has a Master's in library and information science from Simmons College and has held positions in public and academic libraries before coming to the CDC in 1988.

Wendy Weitzner

Wendy is the Librarian of the Cleveland Museum of Natural History. She received her MLS from Kent State University School of Library Science in August 1988 and began as the Librarian at the museum that same month. Wendy has an undergraduate degree in cultural anthropology from Oberlin College. She is also a member of the Cleveland Chapter and the Museums, Arts, and Humanities Division of SLA, and Ohio Women Librarians (OWL).

Updating the Long Range Plan**Calling All Ideas!**

The Biological Sciences Division is currently updating its long range plan. In line with the association, we would like to define some goals for the next ten years. Think about the division, what you like, what we need to expand or change, or anything else that you think should be a division goal. Please send your suggestions, ideas, or comments to Jane B. Cole, Director or Anna Therese McGowan, Past-Chair. We appreciate your contributions in guiding the division through the end of the century.

Books in Brief

Adaptation of Turnkey Computer Systems in Sci-Tech Libraries. Ellis Mount, editor. New York: Haworth Press, 1989. 116p. \$22.95. ISBN 0-86656-859-X.

Originally published as an issue of *Science & Technology Libraries* (v. 9, no. 1, 1988), its purpose is "to deal with the problems and benefits of installing a ready-made computer system in a sci-tech library." The first paper describes a process for selecting a system. The remaining papers provide examples of libraries that have installed Geac, CLSI, NOTIS, and Library Automation Products' "The Assistant."

Healthcare Recruitment Resource Guide. Clearwater, FL: Florida Reference Press, 1989. 473p. \$79.95. ISSN 1046-4603.

This volume "was put together to help hospitals and healthcare facilities find medical professionals more effectively." Professions covered are medical-surgical technologist; nursing; occupational therapy; physicians assistant; pharmacy; physical therapy; respiratory therapy; radiologic technology; and speech pathologist. Each section, arranged by profession, has subsections providing job descriptions; listings of national and state associations; education and training programs; conventions; and publications.

The Role of Conference Literature in Sci-Tech Libraries. Ellis Mount, editor. Binghamton, NY: Haworth Press, 1989. 146p. \$24.95. ISBN 0-86656-780-1.

The aim of this work is "to present a variety of viewpoints on conference literature, including that of librarians, commercial publishers, producers of indexing/abstracting tools, catalogers and editors." A highly useful paper by Nestor L. Osorio provides a tutorial in the use of conference proceedings. Originally published as an issue of *Science and Technology Libraries* (v. 9, no. 2, Winter 1988).

Sources of Free Materials for Biology Libraries

Adam L. Schiff, Assistant Editor

Many librarians are unaware of the vast number of valuable publications that are available free just for the asking. Over the last several years of doing collection development in the biological sciences, I have built up a large list of government agencies, research institutes, museums, university departments and programs, and even individuals, that are willing to send their publications free of charge. Many of these organizations will put you on a mailing list to receive all new publications automatically or will send you periodic announcements of available items. Publications that can be obtained range from multi-volume monographs, research and technical reports, and serials, in both print and microform format, to pamphlets and offprints suitable for specialized research collections.

What follows is a selected (and in no way systematic) list of names and addresses of organizations that can provide you with valuable resources to enhance a biology collection. Write to them and ask to see a list of available materials and have them place you on their mailing list if they have one.

I have not included agencies of the United States government, since that list alone would be enormous. However, the U.S. Departments of Interior (particularly Fish and Wildlife Service and National Park Service), Agriculture (especially Forest Service), Health and Human Services, Energy, the Environmental Protection Agency, and all of their subordinate branches and units are particularly important in this regard. All issue superb biology publications and will supply them gratis on request. The *Government Research Directory* (5th ed., Detroit: Gale Research, 1989) is a useful resource for addresses and descriptions of research and publications of federal institutions.

Other directories that I have found particularly useful include:

- Agricultural Research Centres*. 9th ed. Harlow, U.K.: Longman, 1988.
- Conservation Directory*. Washington, D.C.: National Wildlife Federation. Annual.
- European Research Centres*. 5th ed. Harlow, U.K.: Longman, 1982.
- International Research Centers Directory*. 4th ed. Detroit: Gale Research, 1988.
- Life Sciences Organizations and Agencies Directory*. Detroit: Gale Research, 1988.
- Pacific Research Centres*. 2nd ed. Harlow, U.K.: Longman, 1988.
- Research Centers Directory*. Detroit: Gale Research. Annual.
- Scientific and Technical Organizations and Agencies Directory*. 2nd ed. Detroit: Gale Research, 1987.
- Yearbook of International Organizations*. Munchen, Germany: K.G. Saur. Annual.
- World Directory of Environmental Organizations*. Claremont, Calif.: California Institute of Public Affairs, 1989.

If you would like a copy of my complete list, which is maintained as a WordPerfect file entitled "Freebies", send me a formatted 3.5" or 5.25" diskette and I will be happy to send you the complete list.

New Member Profiles

Eileen Donohue

Eileen is Food and Drug Specialist in the food and drug law section at the law firm of Arnold & Porter in Washington, D.C. She does medical and scientific literature review and research for the firm's drug, medical device and food company clients who are trying to get new products approved through FDA or who have product liability cases. Her work involves online searching, reviewing and synthesizing the literature, and technical writing. Eileen was previously a registered nurse. She has also functioned as a consultant to medical malpractice and personal injury plaintiff attorneys.

Richard A. Eissinger

Richard is presently completing the M.S.L.S at the University of Tennessee at Knoxville. He will be starting in December as a science/technology reference

librarian at the Sterling C. Evans Library, Texas A&M University. Richard earned a B.A. in biology from California State University at Fresno and did graduate work in marine biology at the Moss Landing Marine Laboratory in California. Prior to his involvement in the library profession, he worked for many years in technical management in the mariculture and in the mushroom industry.

Bonnie Myers

Bonnie is in charge of the Research and Development Library at Cytogen Corporation in Princeton, NJ. Her responsibilities include all aspects of library services: interlibrary loan, computer searching, journal and book acquisitions, etc. Prior to working at Cytogen, Bonnie was employed by McNeil Pharmaceutical (now PRI) in various aspects of library and information service.
